

## **Tapescript BW 3.3**

### **Part 2**

We are pleased to be involved in Europe and also in Asia. Countries which have membership of the EU, the European Union, are very attractive to investment from Asia. Britain offers the best of both worlds as there is a firmly focused economic policy based on low inflation and also a low cost of borrowing money. At the same time we have access to the largest free trade zone in the world, the European Union. This means that Asian investors can gain access to these markets very easily if they relocate their headquarters or factories. We are also pleased to be involved in several joint ventures with the PRC - the People's Republic of China.
