### Import Data File / Student Mapping

The screenshot shows the 'Lui Kee Through Train School' interface. The left sidebar has 'SLP' highlighted. The main content area displays a warning message: 'Warning: The following WebSAMS student(s) has(have) no matched record(s) in JUPAS's Student List:'. Below this is a table with columns: 'Full Name', 'Class', 'Cis No.', 'JUPAS', 'Host Dep No.', and 'JUPAS data exist'. The table lists several students with 'LI' and 'Mc' as names and 'SS6Y' as classes. A second warning message follows: 'Warning: There is/are 7 student record(s) in JUPAS's Student List cannot be found in WebSAMS.' Below the warnings are 'Proceed' and 'Back' buttons.

Full Name	Class	Cis No.	JUPAS	Host Dep No.	JUPAS data exist
LI	SS6Y	22			Y
LI	SS6Y	23			Y
LI	SS6Y	24			Y
LI	SS6Y	25			Y
Mc	SS6Y	27			Y
WE	SS6Y	28			Y
WE	SS6Y	29			Y

7. Q : After importing the Student List, why are there warning messages telling 'no matched records'?

A : After importing the Student List, system would check whether the students in the file can be mapped to the students existed in WebSAMS.

- 1) It means that some WebSAMS students cannot be found in the Student List. Normally, they are students who do not intended to apply via JUPAS. If some students listed are intended to do so, you may liaise with the JUPAS office and see if you need to rectify the student information and re-send it to the JUPAS office.
- 2) It means that the Student List may consist of some applicants who are NOT the students in your school. You may need to contact the JUPAS office and report to them about the irregularities.

If the information listed is correct, you can click 'Proceed' button to the next step.

### School Reference Report

The screenshot shows the 'School Reference Report' interface in the JUPAS Application. The left sidebar contains a menu with 'SLP' highlighted. The main area displays the 'School Reference Report > Gen Academic Performance Info' page. A message at the top states 'Record(s) saved successfully.' Below this, there are tabs for 'Academic Performance (Add Subjects)', 'Maint Personal and General Abilities', and 'Maint Supplementary Info'. A 'Prepare Data File' button is visible. The 'List Component' section includes checkboxes for 'Mathematics' and 'Technology & Living'. A search bar is present. The 'Assign' section has three rows for assigning 'Academic Result Retrieved From', 'Assessment', and 'Weighting' for all subjects, with dropdown menus for 'S6(2012)', 'T1A1', and percentage values, and radio buttons for 'ATA1' and 'ATA2'. Below this is a table with columns: WebSAMS Subject / Component, MOI, Academic Result Retrieved From, Assessment, Weighting, and HKDSE Subject. The table contains several rows with checkboxes, subject names like '&15 kkk', '&CC Combine Science (chemistry grp)', '&CP Combine Science (physics grp)', '&CS Combine Science Science grp1', '&IT TT', '005 Accommodation And Catering', and '952 Mathematics (Mod...'. A modal dialog box titled '網頁訊息' (Web Message) is open, displaying a question mark icon and the text: 'Academic performance information has been generated before. If it is generated again, the following data would be cleared. Are you sure to continue?' followed by two bullet points: '- the academic performance previously maintained' and '- student remark for percentile and overall rating of academic performance'. At the bottom of the dialog are '確定' (OK) and '取消' (Cancel) buttons. At the bottom of the main interface, there are 'Reset', 'Save', 'Setup', and 'Generate' buttons. A 'Note' section at the very bottom provides details about percentile calculations and student numbers.
