

Students

“We need the passion and confidence in order for our project to be successful.”

“We have learnt a lot of things in terms of responsibility, leadership skills, team work and more.”

“Throughout the project, we think attitude is also one of the learning aspects of the project. We thought attitude is one of the main problems due to our passion towards the project. It greatly decreased our sense of involvement to the projects. After the review, we all agreed that proactive and devotion are the main factors for us to get improved.”

“Since this is a team work, sharing common mission and vision, and cooperate with others help us to understand deeply about our goal. In our daily life, be confident and strive to do our best with others make a good team.”

“We should set small-scaled goals, so that when they are achieved we are motivated to move forwards.”

“Although we had encountered many problems, every member of our group has learnt a lot from the mistakes. These learning experiences are valuable as they cannot be obtained from books.”

“We learnt the importance of self-reflection. This project has taught us to reflect on what we have done. It is important to accept the fact that it is absolutely normal to make mistakes. What matters the most, it is not the number of mistakes you made, but rather what we can learn from these mistakes.”

“The project has also sharpened or communication and problem-solving skills.”

“The project has taught us that the keys to life-long success are responsibility, enthusiasm and self-reflection.”
