

Foreword

This teaching package serves as a supplement to the *Syllabuses for Secondary Schools: Mathematics (Secondary 1-5) (1999)* (to be referred as the Syllabus hereafter), which will be implemented at S1 in 2001. It aims to provide teachers with resource materials for teaching mathematics through the use of Information Technology (IT).

This teaching package consists of a loose-leaf booklet and one piece of CD-ROM. The booklet contains brief notes on the use of IT on teaching mathematics and the points of concern when using the exemplars in the teaching package. The CD-ROM contains exemplars in document format and the application files of the computer software concerned. In writing the exemplars in this teaching package, the exploratory activities are designed in line with the underlying principles of the Syllabus. Teachers can make copies of the exemplars or worksheets directly from the booklet or the CD-ROM. They may modify the materials to suit their needs.

Comments and suggestions on this teaching package are most welcome. They should be sent to the Chief Curriculum Development Officer, Mathematics Section, Education Department, 12/F, Wu Chung House, 213 Queen's Road East, Wanchai, Hong Kong (fax no.: 2119 9075; e-mail address: math@ed.gov.hk).
