

Title of School-Based Support Service (On-site Support) (2024/25)

K1 Cultivating Children’s Positive Values and Attitudes for Nurturing Good Citizens

K2 Cultivating Children’s Curiosity and Exploratory Spirit through Life Experiences

<p>Online Application Code</p> <p>K1</p> <p>K2</p>

1. Objectives

The school-based support service aims to:

- support teachers to develop their school-based curriculum that caters for children’s needs through collaboration and reflection, with a view to cultivating children’s positive values and attitudes and fostering their inquisitive mind, as well as achieving the goal of whole-person education

2. Foci of Support

Cultivating Children’s Positive Values and Attitudes for Nurturing Good Citizens

(code number for online application: **K1**)

- To help kindergartens establish the directions and foci on the development of values of children, enhance the interactive elements of the learning environment so as to nurture children’s proper values and instil positive attitudes towards life, in accordance with the curriculum aims and school-based needs
- To enrich children’s experience by integrating the elements of value education into different learning areas, and encourage them to reflect on the impact of their own behavior on others, with a view to helping children learn self-discipline, care for family members, friends and the community, as well as respect and appreciate for others, in order to nurture good citizens
- To develop children’s understanding of self, family, school, society and country, and their roles and responsibilities in social groups, as well as enhance their understanding and appreciation of Chinese culture with the aim of fostering a sense of national identity
- To make good use of reading and diversified teaching strategies, and adhere to the core principles of integrated curriculum so as to foster children’s whole-person development
- To cater for learner diversity among NCS children (if applicable)

Cultivating Children’s Curiosity and Exploratory Spirit through Life Experiences

(code number for online application: **K2**)

- To help kindergartens design appropriate exploratory activities to sustain children’s curiosity and exploratory spirit in accordance with the school-based curriculum and children’s life experiences
- To facilitate children in exploring their surroundings and understanding life and natural phenomena with multiple senses and various skills, and to instil in them the values and

attitudes to respect, appreciate and cherish the environment and nature, as well as guide them to learn self-discipline and take good care of public property

- To make good use of reading and diversified teaching strategies to help children understand the relationship between natural phenomena and daily life, inspire children's pursuit of knowledge, develop problem solving skills and creative thinking
- To introduce the inventions and innovative technologies of the country, thereby allowing children to appreciate the excellence and wisdom of Chinese culture, with the aim of fostering a sense of national identity
- To cater for learner diversity among NCS children (if applicable)
